DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art of record, taken as a whole, does not show nor suggest the combination of limitations require by the claims. The prior art shows gaskets having a rubber coating on a rigid substrate (e.g. Suzuki or Sasaki). The prior art shows rubber compositions used for gaskets having at least one rubber powder in a liquid rubber. Jonaz and Matsushita, for example, teach that two different rubber powders can be used. And, Jonaz discusses the importance of varying the particle sizes. However, none appear to specifically disclose that the first ground rubber powder having the lower Shore A hardness has a greater average diameter than that of the second ground rubber powder having the higher Shore A hardness in combination with the other required process steps. And, there does not appear to be any motivation, absent Applicant's own disclosure, to modify the prior art in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
